

The ASC Boom System is an infinitely variable operating room solution that can help you make the most of your OR, no matter the size or scope. The ASC Boom System is an economic and ergonomic platform that can bring the sophistication of the most advanced operating room to your hospital or ambulatory surgery center in a compact package. With all of the services you need, Auriga Lights, and Libra Monitor Booms, all suspended from a single ceiling mount, the ASC Boom system can provide everything you need in ORs with as little as 9 feet of height.
