

The Cogent™ Boom System is an infinitely variable simulation boom system that can allow you to train the professionals of tomorrow on today's cutting-edge equipment. The Cogent™ Boom System can be configured across the line of Cygnus Boom Arms and Titan Vertical Service Heads to create an effective training boom within your budget. With ample room to upgrade with interchangeable service head components and accessory mounts, the Cogent™ Boom System can grow as your needs evolve. With useful organizational tools and smooth mobility, the Cogent™ Boom System can make organization and prep easy by stowing equipment overhead when not in use and consolidating storage, monitors, and devices on the pendant system.
