

Hyperion Horizontal Service Head

The Hyperion Horizontal Service Head is a space-saving solution that delivers an abundance of services and organizational function. The Hyperion features customizable gas, electrical, and low voltage receptacles to provide the exact services you need. With replaceable receptacles and blanks in the casing, the Hyperion can be reconfigured without needing extensive downtime, allowing it to fulfill your evolving needs. With a compact design, the Hyperion can be parked overhead, providing maximum space in even the most crowded and small ICUs and ORs.
