UPGRADE THE EFFICIENCY AND SAFETY OF ANY FACILITY WITH THE PERFECT ICU SOLUTION

A TRANSFORMATIVE IMPROVEMENT

The **ICU Workplaces** offers a solution to transform any space into a perfectly arranged ICU. With countless customizable configurations, the **ICU Workplaces** can scale to meet the needs of your facility.

With single and dual pendant options featuring the whole line of **Cygnus Boom Arms** and the versatile **Titan Service Head**, there is no limit to the patient services and equipment that the ICU Workplaces can accommodate. With this solution, you can easily and efficiently connect to all necessary equipment in your ICU.

AN ABUNDANCE OF SAFETY

The **ICU Workplaces** offers healthcare professionals the flexibility to quickly adjust the pendant system and equipment in case of an emergency. Caregivers can gain unrestricted access to a patient, reposition medical devices, and bring new equipment close at a moment's notice. Organizing equipment and cords above the floor also removes tripping hazards and obstacles.

A TAILORED FIT

The **ICU Workplaces** is custom-tailored to meet your facility's unique needs and particular budget. The system can be configured down to the number and position of receptacles. From economic single tube systems to extensive dual arm solutions, the **ICU Workplaces** can fit any space. Design the perfect fit for your facility and equip it with the accessories you need.

ORGANIZE

- Secure cables and hoses safely within the boom arms
- Easily power devices with integrated cable management systems
- Deploy a Multi-Function Rack to mount shelves, baskets, IV racks, and more

CUSTOMIZE

- Arrange receptacles and equipment in any configuration or orientation
- Mix and match **Cygnus Boom Arms** for the optimal combination of reach, size, load capacity, and features
- Enjoy a range of colors to promote patient comfort

OPTIMIZE

- Mount monitors to keep important information and patients' status close on hand
- Facilitate patient transfers and rehabilitation with a Phoenix Patient Lift
- Improve safety while preserving patient comfort with indirect lighting and exam lights
- Enhance medical staff's work environment and reduce patients' stress with high quality atmospheric sound
- Power temporary devices with an extractable power rail equipped with electrical outlets
- Utilize equipment rails to easily attach accessories and quickly replace them whenever needed.
