## INFORMATION AT YOUR FINGERTIPS WITH A RANGE OF DISPLAY SOLUTIONS

### AT A GLANCE, WHEREVER YOU ARE

The **Libra Monitor Boom** system allows for documentation, camera feeds, imaging, and a host of other information to be close on hand for medical staff, whether in the ICU, OR, laboratory, or any other setting. With a full range of horizontal movement and arm reach up to 10 ½ feet, the **Libra** can be viewed from anywhere in the space. All **Libra** models also feature either a tilt range of 70° or vertical movement functionality.

### AMPLE CAPACITY

The **Libra** system offers solutions to mount as many displays as you need in any configuration. Single and double display mounts offer simple and economic options for any setting. Multi-arm systems allow information to be displayed at varied angles to give different staff members exactly what they need to see in the OR.

Seamless multi-panel systems afford sophisticated and extensive displays that can fulfill the most intensive needs. With these varied configurations, the **Libra** system can support your healthcare facility.

### FUTURE-READY OPTIONS

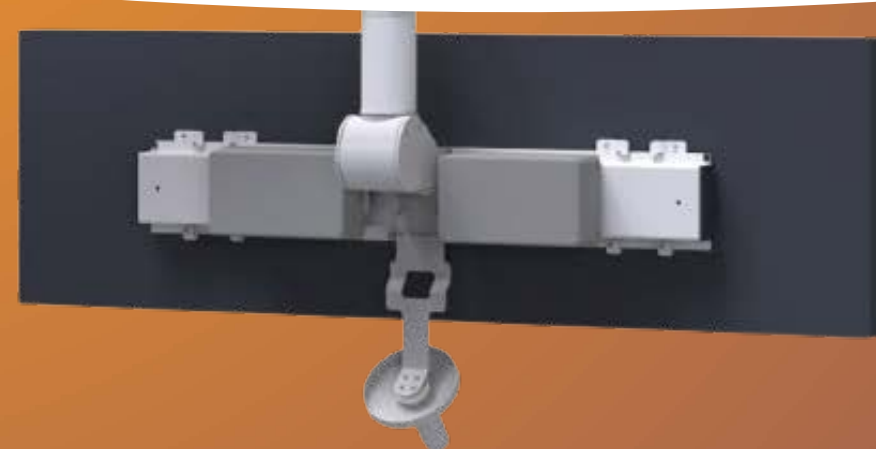

The **Libra** system allows monitors to be mounted, removed, and replaced at any time, affording the ability to upgrade display systems without needing to replace mounts. The special frameless design allows for the use of monitors of different sizes and from different manufacturers, taking the guesswork and hassle out of upgrading monitors. Rear bodies provide space for the addition of upgrades and accessories, such as power packs, storage space, and speakers, ensuring that the **Libra** system can evolve as your facility does.

### COMPREHENSIVE OPTIONS

- Mount up to 8 displays on a single display
- Deploy tandem arms with single or dual monitor mounts to decentralize displays
- Utilize **Cygnus L V Boom Arms** with 400 lbs load capacity and a vertical movement to support even the largest screens
- Choose compact monitor booms with 70° tilt for comfortable viewing at any angle
- Deploy smaller **Libra Monitor Booms** for an economical tablet mount for patient infotainment
- Mount in tandem with **Auriga** Lights for convenient lighting and display

### A CUSTOM FIT

- Enjoy the flexibility of varied handle options on most models including removable stainless steel, and disposable options
- Configure the rear body to your liking with cable boxes, speakers, batteries, and more
- Choose the monitors you want across a swath of styles and manufacturers—and replace them at any time as you need
