

The Libra Monitor Boom provides a host of display options to place any amount of information directly at you and your staff's fingertips. With special frameless designs and VESA mounting brackets, the Libra can support a swath of displays from different manufacturers and of different sizes. The Libra's versatility allows for your facility to upgrade and change monitors without having to replace the mounts, keeping it future-ready. With extensive reach, vertical movement options, and significant tilt ranges, the Libra offers solutions to fulfill your facilities information needs.
