

Selene Anesthesia Boom

The Selene Anesthesia Boom is a compact and economical solution for supplying anesthesia machines and providing other services in even the smallest spaces. With an optional extension arm and spring-based friction locks, the Selene can smoothly be positioned at any angle to supply devices anywhere in an OR, no matter the size. By providing services to anesthesia machines and other equipment from the ceiling; you can reduce tripping hazards and allow anesthesiologists and other healthcare professionals to work without added obstructions.

Features

- Internal storage of supply lines
- Customizable gas, electrical, and low voltage receptacle layouts
- Spring-based friction brake without needing to set and reset locks
- Designed for one-handed movement
- Reach up to 7 ¼ feet
- Extensive freedom of motion, laterally and vertically
- Sleek, hygienic construction
- Parking overhead or angled to maximize space

Options

- Extension arms to increase reach
- Comfort handle with integrated cable guides
- Auriga Exam Light mounted to the Selene, without increasing footprint
- A range of color options
