## VERSATILE AND ERGONOMIC SUPPLY, TAILORED TO YOUR ICU AND OR NEEDS

### PERFECT VERSATILITY

The **Titan Vertical Service Head** can be configured from nearly limitless combinations of its 6 interchangeable components: the Base, Gas Module, Electrical Module, Infusion Module, Multi Function Rack, and Shelves (with optional drawers).

The system's configuration can be tailored to fit your needs, providing the maximum supply and use in the minimal space.

### LIMITLESS FLEXIBILITY

The **Titan's** receptacles can be positioned in the front and/or the back of the service head for optimal planning and efficient operation. The **Titan** can feed devices on any side and at any angle.

### DIFFUSE LIGHTING

With dimmable LED lights integrated into the bottom of the service head, the **Titan** provides fall prevention in the ICU and indirect lighting in the OR. The gentle lighting and controllable brightness offers comfortable illumination in any setting. Optional full RGB lighting offers complete customization.

### ATMOSPHERIC SOUND

The **Titan** can be equipped with an audio system designed for medical applications in the ICU and OR. It features a docking station for wired connections as well as full Bluetooth compatibility and a convenient infrared remote control.

With premium sound delivered by integrated speakers or an external spherical speaker; the **Titan's** sound can improve the work environment and comfort of medical staff while soothing patients.

### FLAT SCREEN HOLDER

- Flexibly position flat screen monitors
- Mount directly on the Multi-Function Rack
- Mount flat screens with the VESA interface

### EQUIPMENT CART

- Dock and undock easily with the one-hand release lever
- Connect safely and securely with patented click-and-move technology
- Dock on either side of the Multi-Function Rack for added flexibility

### DEVICE LIFTER

- Utilize a larger base and motorized vertical movement
- Raise anesthesia machines, endoscopy carts, and other heavy equipment with ease

### SHELVES

- Quickly and easily install on the front or rear of the Multi-Function Rack
- Confidently rely on the solid aluminum construction with 175 lbs load capacity
- Operate the pendant system comfortably with ergonomic handles and soft cleanable buttons
- Install single or double drawers under the shelf for added storage

### CABLE CHANNEL

- Mount conveniently between shelves on the Multi-Function Rack
- Organize messy cables
- Secure loose and excess cords to remove tripping hazards
